

Tungsten Electrode Grinder

Ultra-light weight and compact design allow you to grinding, squaring and cutting tungsten electrodes used in TIG welding anytime and anywhere, ensuring speed and precision.

Grinding **Squaring** **Cutting**

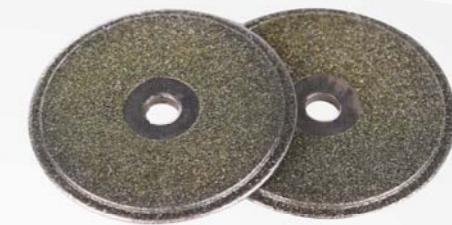

Features

- 2 different angles; 4 different electrode diameters
- Grinding, squaring and cutting function
- High angular precision through preset grinding angle for all electrodes
- Ultra-Light and rapid processing, 1kg only
- Grinding in the longitudinal direction for optimal arc ignition and high arc stability
- Guarantees a higher service life and ignition ease of the tungsten electrode
- Specially for small batch production directly on the building site
- Precise cylindrical grinding
- Short machining times through the high grinding capacity
- Reduced work required without setup time

Diamond grinding wheel-U1830

40CR with medium grain coating
Both sides diamond coated
OD:37.5mm
ID:5mm
Thickness: 2.4mm

Standard supply

Electrode grinder-1pce
Grinding wheel -1pce
Dust protection-1pce
Spare carbon brush-1 pair
Hex key to replace the grinding wheel

Specification

Model	TG-30 Mini	TG-30 Mini
Code	30220	30110
Power Supply	230VAC 50/60HZ	110VAC 50/60HZ
Power	400W	
Electrode Dia.	1.0, 1.6, 2.4, 3.2mm	
Grinding Angle	22.5° , 30°	
Power Cable	1.5M	
Duty Cycle	100%	
Speed	27000rpm	
Net Weight	0.95kg	
Shipping weight	1.1 kgs	
Package	Carton	
Packing size	300*100*80mm
